

Just follow the 5 easy steps in this brochure and you'll be on your way in no time...

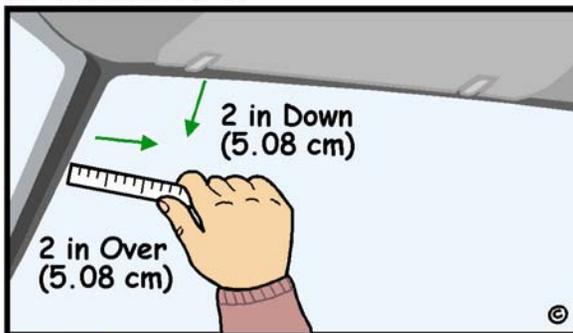

➡ Read this first!

- ♦ You **MUST** correctly and permanently install the tag on the windshield before approaching the access control gate. Do not attach the tag to your visor or other temporary location.
- ♦ Do not wave the tag or hold it inside or outside your vehicle as you approach the access control gate.
- ♦ If you have another type of tag on your windshield, you must mount the windshield sticker tag at least 2 inches away from the other tag.
- ♦ If you have a metallized windshield, you **must** use a license plate tag rather than a windshield tag. Contact the facility manager. For a list of vehicles with metallized windshields, go to the following web site:
www.transcore.com/support/Vehicles_Only_List.pdf
- ♦ Install the tag when the windshield's temperature is **above** 50°F (10°C). In colder climates, use your heater/defroster to warm the windshield before installing the tag.

➡ Here's what you need...

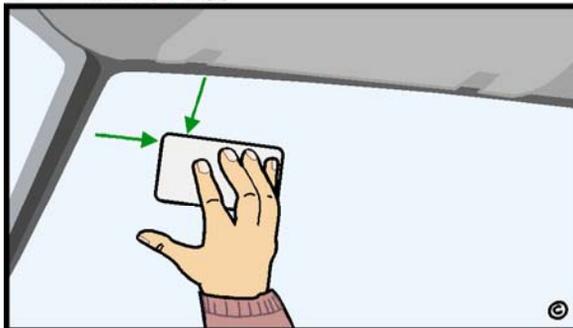

1 Measure

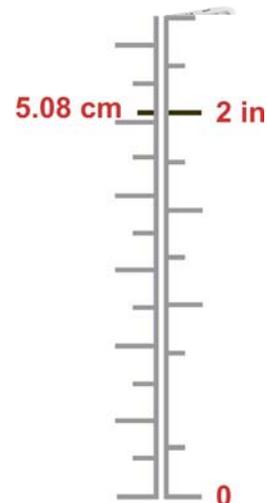

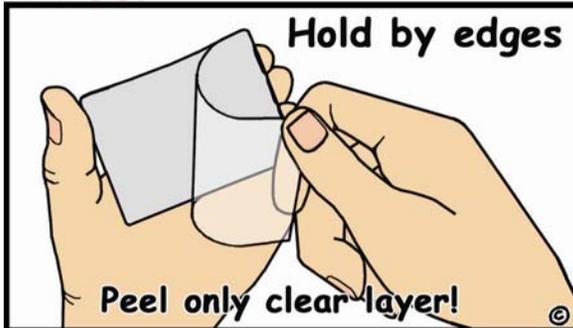

2 Clean

3 Position

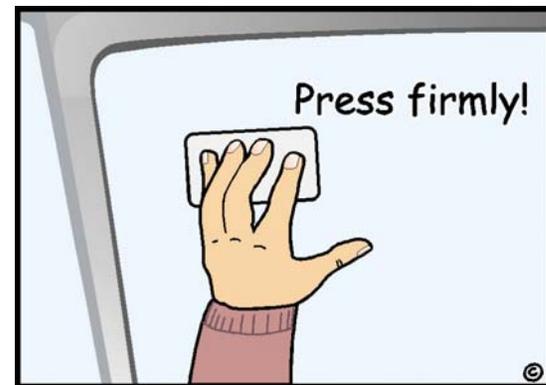

4 Peel

5 Apply

Make sure you have the tag in the correct location before touching it to the glass. Once you have applied it to the glass, you cannot move it without damaging it.

➡ You're finished!

You're ready to use your tag in the facility. Approach the access control gate slowly so that the tag reader will read the tag correctly and the gate arm will rise.

Removing your Tag

If you no longer need your sticker tag and want to remove it from your windshield, peel off the tag, scrape off any remaining tag residue, and clean that area of your windshield with an alcohol wipe or windshield cleaner. Once you remove your tag, you cannot reuse it.

Quick and Easy Installation Instructions for

Windshield Sticker Tag

*Note to Facility Manager: These instructions are for use with a **SIDE-FIRE READER SYSTEM** and the eGo® Windshield Sticker Tag.*
